Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	**Stage 1**	**Stage 2**	**Stage 3**
Actions *What does the customer do?*	• Opens the Flood Prediction web application. • Enters disaster and environmental details. • Clicks the Predict Flood button.	• Waits for the Machine Learning model to process the data. • Views flood prediction result. • Checks flood risk percentage and graphs.	• Takes preventive actions if flood risk is high. • Shares the prediction with others if necessary. • Plans evacuation or safety measures.
Touchpoint *What part of the service do they interact with?*	• Web Dashboard • Input Form • Prediction Button	• Machine Learning Prediction Engine • Flask Backend • Result Dashboard	• Prediction Result Page • Risk Charts • Emergency Planning
Customer Thought *What is the customer thinking?*	• “Will my area experience flooding?” • “Is the system easy to use?” • “I hope the prediction is accurate.”	• “The prediction should be reliable.” • “I want quick results.” • “What is my flood risk percentage?”	• “I should take precautions if the risk is high.” • “I can protect my family and property.” • “This information helps me make better decisions.”
Customer Feeling *What is the customer feeling?*	Curious, Concerned, Hopeful	Interested, Confident, Alert	Relieved (if low risk) or Prepared (if high risk)
Process Ownership *Who is in the lead on this?*	User (Resident / Disaster Management Officer)	Flood Prediction System (Machine Learning Model & Flask Application)	User with support from Disaster Management Authorities
Opportunities *How can we improve this stage?*	• Improve user interface. • Simplify data entry. • Add input validation.	• Increase prediction accuracy. • Reduce prediction time. • Display clearer visualizations.	• Add SMS/Email alerts. • Integrate live weather data. • Provide evacuation recommendations.
