Project Timeline

Overview

The Flood Prediction System project is planned and executed in different phases, starting from problem identification to final deployment and documentation. The timeline helps in completing the project systematically within the planned duration.

Project Schedule

Phase	Activities	Duration
-----	-----	-----
Phase 1	Problem Identification and Research	Week 1
Phase 2	Requirement Analysis and Dataset Collection	Week 2
Phase 3	Data Preprocessing and Feature Selection	Week 3
Phase 4	Machine Learning Model Development	Week 4
Phase 5	Model Testing and Evaluation	Week 5
Phase 6	Flask Web Application Development	Week 6
Phase 7	System Integration and Testing	Week 7
Phase 8	Documentation and Project Demonstration	Week 8

Development Approach

The project follows an incremental development approach where each module is developed, tested, and improved step by step.
