

Project Demo Planning

Date	15-07-2026
Team ID	
Project Name	Rising Waters
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demonstration plan ensures that the Flood Prediction System Using Machine Learning is presented clearly and effectively. The demo highlights the project's objectives, workflow, machine learning prediction process, and overall functionality.

Demo Plan

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the flood prediction problem, project objectives, and motivation.	2	Team Member 1
2	Solution Overview	Explain the system architecture, technology stack, dataset, and machine learning models used.	3	Team Member 2
3	Live Application Demonstration	Demonstrate the Flask web application, user input form, and flood prediction process using sample data.	5	Team Member 3
4	Prediction Results & Dashboard	Display prediction results, flood risk level, and visualizations/charts.	2	Team Member 4
5	Testing & Performance	Present functional testing, performance testing results, and prediction accuracy.	2	Team Member 1
6	Future Enhancements & Conclusion	Discuss future scope, real-world applications, and conclude the	1	Team Member 2

		demonstration.		

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the importance of flood prediction and project objectives.
2	Solution Overview	Describe the architecture, technologies (Python, Flask, Scikit-learn, XGBoost), and dataset.
3	Live Feature Demonstration	Show user input, machine learning prediction, and flood risk output using the web application.
4	Q&A Session	Answer evaluator questions regarding implementation, algorithms, testing, and future improvements.

Total Demo Duration

Approximately 15 minutes

Demo Highlights

- User-friendly Flask web interface
- Environmental parameter input
- Machine Learning-based flood prediction
- Real-time prediction results
- Interactive dashboard and visualization
- Testing and performance evaluation
- Future enhancement discussion
